Aldila's VS Proto™ scores playoff win on Nationwide Tour

POWAY, Calif. – The winner of the Nationwide Tour's Oregon Classic in Junction City, Oregon shot back-to-back 67s on the weekend using Aldila's VS Proto shaft and then made birdie on the second playoff hole to claim his second win of the 2007 Nationwide Tour season.

"The VS Proto is the straightest, longest shaft we have ever offered - with feel other shafts can't touch," said Stewart Bahl, Aldila's Marketing Manager.

The hottest shafts in golf were once again the leading choice for woods and hybrids on the Nationwide Tour. Always a dominating force of the hybrid shaft industry, Aldila turned in a two-to-one advantage over the next leading shaft manufacturer, according to the Darrell Survey. Aldila also had 29 more woods shafts in play than the second leading shaft company.

The VS Proto™ shaft incorporates Aldila's innovative new Next Generation Micro Laminate Technology™ featuring Carbon Nano-tubes, combined with Aldila's proprietary A65 Performance Resin System, using advanced ultra high modulus graphite fibers, all synthesized into Micro Laminate Technology™ unparalleled performance and feel.

Aldila remains the leader and innovator and premier manufacturer of high-performance graphite golf shafts. Whether it is a PGA Tour Professional, Club Champion or devoted weekend player, the choice remains the same ... Aldila.

###

ABOUT ALDILA

Aldila is publicly traded on NASDAQ with the symbol ALDA. According to the Darrell Survey U.S. National Consumer Survey, Aldila was the leading graphite shaft manufacturer for new drivers, fairway woods and hybrid clubs for 2006.
