Aldila's VS Proto™ 'By You' shaft propels PGA, Champions Tour winners past opposition

'Hottest shafts in golf' win wood hybrid shaft manufacturer count on Nationwide Tour

POWAY, Calif. – Aldila's VS Proto "By You" shaft posted two victories this weekend as the winner of the PGA Tour's inaugural Turning Stone Resort Championship used the Aldila VS Proto™ and the NV™ in all of his woods. The weekend's second victory for the "hottest shafts in golf" came as the champion of the SAS Championship posted his first win in his first start on the Champions Tour using Aldila's VS Proto and NV shafts.

The VS Proto™ shaft incorporates Aldila's innovative new Next Generation Micro Laminate Technology™ featuring Carbon Nano-tubes, combined with Aldila's proprietary A65 Performance Resin System, using advanced ultra high modulus graphite fibers, all synthesized into Micro Laminate Technology™.

"The straight tapered tooling of the VS Proto™ eliminates the dead zones from taper rate changes found in 90 percent of shafts available on the market today," said John Oldenburg, Vice President of Engineering and Product Development at Aldila. "The VS Proto offers unparalleled performance, consistency and feel ... its the straightest, longest shaft that Aldila has ever offered."

The Nationwide Tour also brought success for Aldila as they walked away with the wood and hybrid shaft manufacture counts, according to the Darrell Survey.

Aldila isn't just a golf company; it's a materials-science think tank that's constantly researching the potential of physical and chemical compounds. They discover them first so you don't have to wait until tomorrow to improve your game.

###

ABOUT ALDILA

Aldila is publicly traded on NASDAQ with the symbol ALDA. According to the Darrell Survey U.S. National Consumer Survey, Aldila was the leading graphite shaft manufacturer for new drivers, fairway woods and hybrid clubs for 2006. For more information on the VS Proto™, MOI Proto™, NV™, and other Aldila products visit their Web site at www.aldila.com.
