Top Ladies player defends Samsung World Championship title using Aldila's VS Proto™, NV™

"Hottest Shafts in Golf" sweep hybrids shaft count on all Tours, capture woods shaft count at Nationwide event

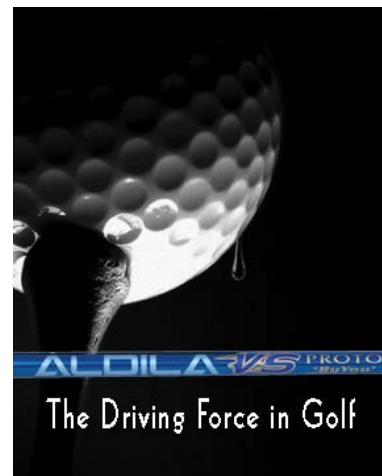

POWAY, Calif. – The number one player on the LPGA Tour successfully defended her Samsung World Championship title and also clinched back-to-back Rolex Player of the Year honors using Aldila's VS Proto™ and NV™ in her woods. She shot a six under 66 on Sunday to win by four strokes at the Big Horn Golf Club in Palm Desert, Calif. and capture her seventh victory of the season.

Aldila also won the woods shaft manufacturer count at the Nationwide Tour's WNB Golf Classic and made a clean sweep of the hybrids shaft manufacturer counts on the PGA, Nationwide, Champions and LPGA Tours.

"The Hottest Shafts in Golf" are tearing up the consumer market as well. According to the Darrell Survey U.S. National Consumer Survey, Aldila was the leading graphite shaft manufacturer for new drivers, fairway woods and hybrid clubs for 2006.

The VS Proto™ shaft incorporates Aldila's innovative new Next Generation Micro Laminate Technology™ featuring Carbon Nano-tubes, combined with Aldila's proprietary A65 Performance Resin System, using advanced ultra high modulus graphite fibers, all synthesized into Micro Laminate Technology™ unparalleled performance and feel.

Aldila remains the leader and innovator and premier manufacturer of high-performance graphite golf shafts. Whether it is a PGA Tour Professional, Club Champion or avid weekend player, the choice remains the same ... Aldila.
