Aldila's RIP Technology™ helps drive Nationwide winner to third Tour victory
'Hottest Shafts In Golf' dominates wood, hybrid shaft manufacturer counts at PGA Championship

POWAY, Calif. – Using Aldila's RIP Technology™ in his Driver, the winner of the Price Cutter Charity Championship captured his third Nationwide Tour victory winning by a tournament-record six strokes. He was one of many players in the field benefiting from Aldila's leading technology; in fact all of the Top 5 finishers were playing Aldila shafts.

"Aldila's RIP™ employs patent-pending technology and exclusive materials to completely transform shaft design from the inside out," said Stewart Bahl, Aldila's Marketing Manager. "Through the use of computer modeling technology and exclusive materials provided by the Aldila Materials Division, Aldila engineers were able to completely rethink golf shaft design and performance. The result is a revolutionary shaft with optimum flex and torque characteristics with incredible feel that continues to be tested and proven on the PGA Tour week after week."

Using Aldila's VooDoo® featuring S-core (stabilized core) Technology™ in his Driver, the Most Accurate Driver on the Nationwide Tour currently leads the field with a 78.43 driving accuracy percentage. The VooDoo's one-piece high modulus carbon stabilization rib runs the length of the shaft. This innovative rib structure keeps the shaft more concentric, preventing shaft ovaling, deformation and wasted energy during the golf swing.

At the PGA Championship, "The Hottest Shafts In Golf" left no doubt who was the #1 shaft on Tour after they lay waste to the competition. Aldila had 36 more of their wood shafts in play than the next leading shaft manufacturer, according to the Darrell Survey. Aldila also dominated the hybrid shaft manufacturer count winning by nearly a 3 to 1 margin over the next leading competitor.

Aldila has the unique ability to fuse high-end design with cutting edge technology. They are continually on the leading edge of the golf world through their relentless pursuit of the next best innovation. Are you playing Aldila or just graphite?
