Turning Stone Resort Champ posts 1st PGA win using Aldila's RIP Technology™ NV® helps Nationwide Tour winner orchestrate come from behind win

POWAY, Calif. – Aldila's cutting-edge technology was at the forefront once again across the PGA and Nationwide Tours this past weekend. With the help of their RIP Technology™ the winner of the Turning Stone Resort Championship came from behind to capture his first victory on the PGA Tour. Aldila's patent pending S-core Technology™ featured in their VooDoo shafts proved very beneficial for the Most Accurate Driver at Turning Stone. Playing their VooDoo in his Driver, he finished the tournament on top with a driving accuracy rating of 87.5 percent.

“Players trust Aldila's RIP Technology™ because it provides lower torque, increased tip stability and better tip stiffness control,” said Stewart Bahl, Aldila's Marketing Manager. “They rely on the S-core (stabilized core) Technology featured in the VooDoo series to help maximize distance and provide players with outstanding accuracy.”

With the help of Aldila's Micro Laminate Technology™ featured in their NV shafts, the winner of the Preferred Health Systems Wichita Open secured a victory and his third Top 10 finish of the season. With the victory, he moved up to seventh on the Nationwide Tour Money list and closer to locking up a 2011 PGA Tour card.

“The dampening advantages of the Micro Laminate Technology have eliminated the distracting and destructive ‘shock’ typically found in conventional graphite shafts,” said Bahl. “The result is a slim, stable design that maximizes distance, improves accuracy and offers the ‘perfect feel’ which has made the NV one of the most sought after shafts on Tour.”

“The Hottest Shafts In Golf” maintained their status as the #1 graphite shaft on Tour winning multiple shaft manufacturer counts at both PGA Tour events and winning the hybrid count on the Nationwide Tour. Aldila captured the wood and hybrid shaft manufacturer counts at the WGC Bridgestone Invitational dominating the hybrid count by more than a 3 to 1 margin over the next leading shaft manufacturer, according to the Darrell Survey. Aldila also won the wood and hybrid shaft manufacturer counts at the Turning Stone Resort Championship with 29 more wood shafts in play than

the next leading competitor. They also won the hybrid shaft count by nearly a 2 to 1 margin over the next leading manufacturer.

Aldila is the leading name in graphite golf shafts: It won golf's Grand Slam in 2009, being the most used wood and hybrid shafts at every Major on the PGA Tour. For two years it has been the most played wood and hybrid shaft at every FedEx Cup Playoff event. Are you playing Aldila or just graphite?

###

ABOUT ALDILA

Aldila is publicly traded on OTCQX with the symbol ALDA. Aldila was the leading graphite shaft manufacturer for new drivers, fairway woods and hybrid clubs for 2007 according to the Darrell Survey U.S. National Consumer Survey.
