QUARANTA®, designed by the same company that brought you the NV® Magnum in 2013 has done it again by improving on this original truly high performance, ultra lightweight, sub-50 gram shaft design.

Typically, ultra lightweight shafts give up strength, flex, torsional stiffness, and overall stability in an effort to chase lighter weights. Our engineers have incorporated our NexGen Micro Laminate Technology® (MLT) to provide the highest level of performance in an ultra lightweight shaft. By optimizing structure, and material placement, the ALDILA® QUARANTA® Series offers optimum flex and torque characteristics for the better player, while still maintaining the feel that players of all abilities need.
