

ROGUE ∞

RETURN OF THE ICONIC ROGUE FAMILY

NEW ALDILA™ ROGUE ∞ Available 2025

Dual Torque Core, Counterbalance

Ideal for the Modern Player

ALDILA™ ROGUE ∞

THE RETURN OF ROGUE®. ALDILA's iconic ROGUE family returns with ROGUE® ∞. The most successful shaft family in the rich history of ALDILA ROGUE boasts more than 70 worldwide professional wins. ROGUE® ∞ cements the family as ALDILA's cornerstone product of the past and present and an exciting part of its future.

The new ROGUE® ∞ is an extremely counterbalanced shaft but also its best feeling, attributable to ALDILA's all-new innovative Dual Torque Core.

The torque core is the most important part of the shaft in determining how the shaft feels as it is directly responsible for the transmission of vibrations from impact into the golfer's hands.

By incorporating 80-Ton Pitch Fiber full-length in the torque core and 46-Ton Pitch Fiber in the shaft's angle plies, ALDILA created a dual layered core – the Dual Torque Core – to drive down torque while creating an extremely counterbalanced shaft that still feels smooth and active in the handle.

This improvement in the torque core, coupled with the strong counterbalance creates tighter dispersion, better consistency swing-to-swing and increased club head speed to help make the golfer faster, consistently.

ROGUE® ∞ was designed with an innovative cosmetic incorporating matte black paint fading into a super-premium ion plated tip section.

ALDILA™ ROGUE ∞ FEATURES

- ✓MID LAUNCH AND MID-LOW SPIN
- ✓80-TON PITCH FIBER
- ✓DUAL TORQUE CORE
- ✓PREMIUM ION PLATING FINISH
