

QUARANTA[®] GOLD

THE LIGHTWEIGHT GOLD STANDARD

NEW Available Beginning March 2021

First Aldila Shaft to Break Sub-40 Gram Barrier

High-Modulus Carbon Fiber to Strengthen Tip Section

More Responsiveness & Lower Torque than Sapphire

ALDILA[®]

QUARANTA® GOLD

ALDILA® QUARANTA® Gold brings the "ultra" to ultra lightweight premium performance. The first ALDILA® series to offer a sub-40g option, these high performance shafts remain remarkably stable even as low and lively as a 35 R2 flex. The QUARANTA® Series is now lighter and stronger than ever, with even tighter torque characteristics than ALDILA® QUARANTA® Sapphire. Yet QUARANTA® Gold maintains the smooth profile and optimal flex desired by better players choosing to play an ultra lightweight shaft. High-modulus MR70 carbon fiber is added to the tip section to provide additional strength and contribute to a design that is lighter, tighter and more responsive. Raising the ultra lightweight bar once again.

Player Profile: QUARANTA® Gold is ideal for any player seeking optimal flex and lower torque in an ultra lightweight shaft.

KEY SHAFT FEATURES + SPECS

Smooth Profile, Tighter Torque

Tighter torque characteristics than ALDILA® QUARANTA® Sapphire, they maintain the smooth profile and optimal flex desired by better players choosing to play an ultra lightweight shaft.

High-Modulus MR70 Carbon Fiber

Same smooth profile with MR70 carbon fiber added to the tip section to provide additional strength and contribute to a design that is lighter, tighter, and more responsive.
